A Message From The President
Jon R. Schneider

Iowa Veterans Home to Hold Agent Orange & Toxic Exposure Town Hall Meeting

The Iowa Veterans Home will host a Agent Orange and Toxic exposure Town Hall meeting for Vietnam Veterans and families. The event will be held at the Iowa Veterans Home on Saturday, April 7, 2018 in the Malloy Leisure Resource Center. The meeting will consist of two sessions. The morning session is scheduled for 9-12:00 pm with the afternoon session for 1-4:00 pm. The Vietnam Veterans of America, Story County, Chapter 1102 will host the event. All Vietnam War veterans and their families are invited to talk about all health effects they are experiencing because of wartime exposure to Agent Orange and Toxic Exposure. All modern day warriors are encouraged to attend. The Town Hall is part of a campaign that was started eight years ago by the Vietnam Veterans of America to raise awareness of toxic effects of the herbicide Agent Orange and other toxic chemicals that were widely sprayed during the war.

“We are honored to be able to be part of this event for Vietnam Veterans and their families. The exposure of Agent Orange containing a cancerous element called dioxin has already claimed the lives of many Vietnam Veterans throughout the years to include their children and now their grandchildren. We wanted to afford the VVA of Story County, Chapter 1102 the opportunity to host this Town Hall meeting at IVH. We want to continue to educate our Veterans and their families,” said Commandant Ojiiri.

Agent Orange was made with tetrachlorodibenzo-p-dioxin, or dioxin for short, and is a potent cancer causing agent. Several publicans have been published to show increased rates of leukemia, Hodgkin and non-Hodgkin lymphoma, soft-tissue sarcoma and chloracne in people exposed to it and may be associated with other cancers and neurological disorders as well. With the exception of liver cancer, these are the same conditions the Veterans Administration has determined may be associated with exposure to Agent Orange/Dioxin, and are on the list of the conditions eligible for compensation and treatment. Vietnam Veterans of America organizations believe that their children and now grandchildren of exposed veterans also are suffering from cancer, birth defects and other health impacts. There was 22 million gallons of sprayed Agent Orange used in Vietnam. The use of this chemical has left many Vietnam Veterans sick and disabled. Military personnel who were involved in storage, mixture and transportation including aircraft mechanics, and actual use of the chemicals were probably among those who received the heaviest exposures.

“Agent Orange was one of the worst errors of judgements that was used during the war. Many have suffered throughout the years having died to the affects of Agent Orange and Toxic Exposure. Today several Vietnam Veterans, children and grandchildren are suffering from the affects of Agent Orange,” said John L. Kost, a member of the Iowa Commission of Veterans Affairs and President of the Vietnam Veterans of America of Story County, Chapter 1102 in Ames, Iowa.

“Our Vietnam Veterans and their families deserve continued awareness of this deadly presumptive disease that was caused by Agent Orange. Whether this was caused by bad judgment or not, our men and women once again answered the call to fight a war that was not very popular. The benefits and health care that our Veterans today receive from the Veterans Administration is a tribute to our Vietnam Veterans. They have fought many battles for the Veteran. I truly believe that they (Vietnam Veterans) have paved the way for a better VA system for our current and future Veterans. Our medical professionals including federal and state legislators must continue to research this deadly disease (Agent Orange) and other toxins to keep all Veterans and descendants of Vietnam Veterans fully educated. I would encourage all Veterans of the Gulf War and Iraq and Afghanistan to attend this Town Hall as well. It will be a very educational event,” said Michael Hines, IVH Executive Assistant, who is a retired U.S. Army First Sergeant, and a veteran of the Iraqi and Afghanistan Wars and numerous overseas deployments.
From the Desk of the National Director
Kenny Lloyd

2018 Advocacy Legislation Seminar

As I prepare for the Legislation Seminar for next month in Washington DC, I always wonder if I will have trouble with my flights or going through TSA. I have had my problems in the past and don’t look forward to getting into those problems again. The Air Access Act has been one of the issues that has been brought up before to our legislators and continues to be an issue for our members. PVA will continue to advocate for our members to have a safe and hopefully an enjoyable flight for wherever their travels may take them.

Some of the other key issues that will be discussed with our legislators are for PVA supporting expanding eligibility for the VA comprehensive family caregiver program. As of right now, anyone hurt after 9-11 their caregivers have health benefits where before 9-11 they do not. I would hope all you would agree the veterans that were hurt before 9-11 are just as important as the one after 9-11. I advocated for this one last year too and I do think there has been progress but not enough.

Improve benefits for catastrophically disabled Veterans. Automobile Adaptive Equipment. Now this one I can relate to and I know one of our board members can relate as well. A year ago, I was rear ended and they totaled my van out. I did not have to wait as long to get my van replaced as our one board member did. There happen to be a veteran with ALS that had ordered a wheelchair accessible van and passed away the day it showed up at the dealership. Since the VA had already approved it and paid for it, I was able to get my van sooner than what it takes the VA to approve getting one. I waited three months but our board member had his van totaled out in July and waited until late December for his van. If anybody has rented a wheelchair accessible van to drive, you will find it will run around $125 a day. My insurance company will not cover that much and I am going to guess there is a lot more out that don’t either. This makes it a hardship for the veteran to get to his doctors appointments or to even have a social life. When a veteran has his van totaled out the VA needs to step up and help those veterans get another van faster than they are now.

I will be in Washington DC the first week of March advocating for these issues and more. I don’t have to be the only one advocating when the veterans right here at home can do the same thing. Things will never change in Washington if we do not speak out.

2018 IPVA Turkey Hunt

The IPVA Turkey Hunt will be held April 28th & 29th in the Hardin County area. Lunches will be provided as well as coffee and donuts to start the day. There will be a volunteer for each hunter. We will also have two Action Track chairs on site for use by wheelchair hunters! If you are interested in participating in the April Turkey Hunt, please contact Kenny Lloyd at 515-570-1402.

Deadline for signup is Saturday, April 14th!
From the Desk of Kim Gould

Legionaire’s Disease at the Quincy, IL Veterans Home

As many of you may know, there has been a terrible health issue at the Illinois Veterans Home-Quincy. On September 1, 2015, the Illinois Department of Veterans’ Affairs (IDVA) and the Illinois Department of Public Health (IDPH) announced the deaths of a total of seven residents at the Illinois Veterans’ Home-Quincy. The seven residents, all of whom had underlying medical conditions, were among the 39 individuals who had been diagnosed with Legionnaires’ disease to date.

At that time, IDVA Director Erica Jeffries said “While saddened by the loss of our residents, having been at the Home and talking with the staff and our residents, I am impressed with their resilience and spirit. We remain vigilant in monitoring our residents and we continue to follow the guidance of our interagency partners to implement remediation efforts across our Home. The safety and quality of care for our residents and staff are our primary concerns.”

IDPH Director Nirav D. Shah, M.D., J.D. went on to say, “We continue to work diligently with our public health and Veterans’ Affairs partners to get immediate medical care to residents or staff at the Home who are experiencing respiratory illness. Unfortunately, we expect to see additional cases and possibly additional deaths because the incubation period for Legionnaires’ disease can be up to two weeks, and because patients with underlying medical conditions are at increased risk of more severe illness.”

On August 30, 2015, IDPH requested aid from the U.S. Centers for Disease Control and Prevention (CDC) for epidemiology and environmental health assistance and three CDC Epidemic Intelligence Service Officers and one environmental health specialist arrived at the Illinois Veterans’ Home – Quincy to work with IDVA and IDPH in investigating the Legionnaires’ disease outbreak. CDC also provided laboratory support from its headquarters in Atlanta, GA.

IDVA and IDPH continued to work closely with the Adams County Health Department to identify and mitigate possible sources of the Legionella bacteria. Public and environmental health officials worked closely with home staff to implement control measures at the home in order to prevent additional individuals from being infected.

Most cases of Legionnaires’ disease can be traced to plumbing systems where conditions are favorable for Legionella growth, such as hot water tanks, cooling towers, and evaporative condensers of large air-conditioning systems. In order to be infected with the bacteria, a person must inhale contaminated water vapor. Legionnaires’ disease cannot be transmitted person-to-person. Legionella bacteria occur naturally in the environment. As such, the source is rarely identified in cases of Legionnaires’ disease. Approximately 300 cases of Legionnaires’ disease are reported each year across in Illinois.

The IVHQ completed an extensive renovation of its plumbing systems in response to the 2015 Legionnaires’ disease outbreak. Renovations included construction of a water treatment plant capable of providing higher-quality water for the Home’s sensitive population. IDVA continues to test and treat its water for harmful bacteria, including Legionella. Along with additional chlorine treatments, IVHQ maintains hot water at 150 degrees to prevent the growth of Legionella. Hot water is then mixed with cold water to a temperature of 110 degrees, which allows for the maximum control of bacteria while protecting residents from scalding.

The Illinois Department of Veterans’ Affairs (IDVA) and the Illinois Department of Public Health (IDPH) recently reported a third laboratory-confirmed case of Legionnaires’ disease at the Illinois Veterans Home in Quincy (IVHQ). The resident is in stable condition. Following this latest report, representatives from the Centers for Disease Control and Prevention returned to the home in Quincy, on Tuesday, February 13 2018 at the request of IDPH, to review testing protocols for individuals with respiratory illness.

IDVA is boosting disinfection levels in its water to further reduce any potential exposure to residents or staff. IDVA is also implementing modified water restrictions across the IVHQ campus, including:

- Installing Laminar flow devices on all sinks. This filter reduces the aeration of the water as it flows from the faucet.
- Limiting bathing to showers only, which are protected with legionella blocking Pall filters.
- Instituting temperature checks every two hours while residents are awake, and full vitals every four hours.

There is an increase in respiratory illness due to other bacteria and viruses this time of year. In addition to infectious disease control and testing protocols, the teams will continue working to trace potential sources of Legionella bacteria and conduct additional environmental health testing.

I am confident that VA and State of Illinois officials and well as IVHQ staff are doing everything they can to eliminate this issue.

Please keep these residents in your thoughts and prayers.

Kim
Annual Clothing Allowance
By: Gus Gonzales
National Service Officer

Now is a good time to start submitting your annual clothing allowance applications. The clothing allowances is a benefit available to veterans who are rated for a service connected condition that requires the use of a wheelchair, or an orthopedic appliances. Also, if an individual have a service-connected skin condition that requires medication which damages the outer clothing maybe entitled to an annual clothing allowance.

You may qualify for multiple clothing allowances if more than one prosthetic appliance and/or medication was used for two different service connected disabilities. An example, being service connected for paraplegia and requiring the constant use of a wheelchair and having a service connected skin condition that requires the use of medication that stains your clothing may qualify you for two separate clothing allowances.

In order to apply, you must submit a VA Form 10-8678 to the Prosthetic and Sensory Service at your local Department of Veterans Medical Center (VAMC) prior to August 1st of each year. The current annual clothing allowance is $795.19, which is paid after August 1st. The application is available on the Department of Veterans Affairs website or you may contact your local Prosthetic Department as well your local PVA Service Officer for assistance.

The applications are collected throughout the year and held until the closing date of August 1st. They are then processed and Veterans should receive their payments between September 1st and October 31st. Please remember this is an annual payment and will only be made during this time frame.

If you have any questions about this benefit, you may contact a Paralyzed Veterans of America’s National Service Office and we will be glad to assist you. Also, I maybe contacted directly at 515-323-7544 for questions regarding this benefit or any VA benefits.

**CALENDAR OF UPCOMING EVENTS**

3/8 Bingo at the Des Moines VA CLC - 6:30 pm
3/11 Daylight Savings Time starts
3/17 Volunteer Advisory Meeting - Iowa Veterans Home Marshalltown
3/22 Iowa PVA Board of Directors/Membership/Caregiver Support Meeting - 11:00 am at the Iowa PVA Office
3/30 Good Friday

4/1– 4/30 PVA Awareness Month
4/1 Easter
4/7 Agent Orange & Toxic Exposure Town Hall Meeting—Iowa Veterans Home Marshalltown (Malloy Leisure Resource Center) 9am—4pm
4/12 Bingo at the Des Moines VA CLC - 6:30 pm
4/19 Des Moines VA Bi-annual SCI Meeting - 11:00 a.m. IPVA Office
4/21 VAC Meeting / Spring Carnival - Iowa Veterans Home in Marshalltown
4/26 PVA Awareness at DSM VA - 9:00 - Noon
4/26 Iowa PVA Board of Directors/Membership/Caregiver Support Meeting - 1:00 p.m. at the Iowa PVA Office
Thank you to Dennis Baldwin of Madrid, Iowa, for donating his time and his skills. Dennis took our 11 foot Board Room table and made it into a 15 foot table. Now all of our Board Members can be around the table together during meetings and events.

Thank you to Rock Bottom Brewery & Restaurant—Des Moines for raising over $800 to support Paralyzed Veterans of America—Iowa during their Veterans’ Day Tapping Party and Beer Sales event in November.

The Mission Statement of Paralyzed Veterans of America

The Paralyzed Veterans of America, a congressionally chartered veterans service organization founded in 1946, has developed a unique expertise on a wide variety of issues involving the special needs of our members—veterans of the armed forces who have experienced spinal cord injury or dysfunction.

PVA will use that expertise to be the leading advocate for:

- Quality health care for our members,
- Research and education addressing spinal cord injury and dysfunction,
- Benefits available as a result of our members’ military service,
- Civil rights and opportunities which maximize the independence of our members.

To enable PVA to continue to honor this commitment, we must recruit and retain members who have the experience, energy, dedication, and passion necessary to manage the organization and ensure adequate resources to sustain the programs essential for PVA to achieve its mission.

Paralyzed Veterans of America Contribute to Vikings’ Super Bowl Stadium Accessibility Redesign

WASHINGTON, D.C. – 2/2/18, The Minnesota Vikings NFL team will be hosting this year’s Super Bowl in a 65,400-seat stadium featuring superior wheelchair access and seating options, thanks in part to guidance from Paralyzed Veterans of America’s (Paralyzed Veterans) Architecture Department and Minnesota Chapter.

The stadium’s redesign began in 2016 when the Vikings’ advisory board formed a committee to provide insight into meeting the Americans with Disabilities Act (ADA) requirements. The ADA, established in 1990, prohibits discrimination based on disability and outlines equal accessibility requirements. As the leading veterans service organization experienced in ADA compliance, Paralyzed Veterans joined the committee as a trusted advisor.

“Our aim was to not only meet the ADA requirements, but exceed them wherever possible as an additional level of access for mobility restricted individuals. The 1.75 million square foot facility features wheelchair-accessible seating at various ticket price points and in more than 100 private suites,” said Mark Lichter, director of architecture for Paralyzed Veterans of America.

As the only veterans service organization that employs full-time architects, Paralyzed Veterans is able to provide the highest level of guidance tailored to the needs of disabled veterans and all people with disabilities. Paralyzed Veterans’ architects operate on a small to large-scale basis, with a broad scope of work ranging from private homes to national sporting arenas. Notable achievements include advising on the accessibility of the Washington National’s Ballpark, the Virginia Governor’s Mansion and the National Dwight D. Eisenhower Memorial.

Though sports fans this weekend will be able to enjoy a fully accessible stadium, the battle for nation-wide accessibility is far from over.

“What it comes down to is seeing the ADA as not something you have to comply with, but as a means of treating people with disabilities with dignity and equality,” Lichter said. “Once that mindset in society changes, then we will make big strides, but we’re not there yet. Good accessible design often does not cost more, and typically leads to better design.”
Paralyzed Veterans of America’s Fellows Program provides paralyzed veterans the opportunity to advocate through its network of public, private and nonprofit organizations. Through public appearances and speaking engagements, Paralyzed Veterans Fellows will serve as leaders among their peers, elevating the nation’s awareness of the contributions and struggles of U.S. veterans living with spinal cord injury or disease. This position comes with compensation.

QUALIFIED APPLICANTS ARE:

- Paralyzed Veterans members or eligible for membership
- Available to work a minimum of 20 hours a month
- Able to travel
- Able to commit to the Fellows 2-year program

Completed Applications Must be Received by November 15, 2017

Paralyzed Veterans of America Names Executive Director

Organization’s policy expert steps in to lead national office operations

WASHINGTON, DC — Paralyzed Veterans of America (Paralyzed Veterans) today announced that its President and Executive Committee have named Carl Blake as the organization’s executive director. Blake has led Paralyzed Veterans’ government relations program since 2014 and has been serving as the organizations’ interim executive director since November 2017.

Blake, a West Point grad and U. S. Army veteran, first became a member of Paralyzed Veterans in 2001, and has served as its associate executive director of government relations for the past three years.
